

Dear Will

Please see attached housing protocol for over 18 year olds in Enfield this is an internal working document and therefore not for publication. In terms of the LAC strategy and health strategy you have referred to the LAC strategy is on Enfield's website and I have attached a link to the local transformation plan from CAMHS which references work with LAC. Locally we have CAMHS staff in our LAC health team which is called HEART and they work closely with social workers and health colleagues to ensure LAC children are supported in all areas including their mental health.
